

## **Team 14-P Debate Decision on Scenarios**

### **Scenario-1**

We feel that the development team made mistakes of not having extensive testing and giving the product with bugs. They should have done a proper testing.

### **Scenario-2**

We feel that Micropenguin cannot only point on Mark for the mistake due to which the company has suffered huge loss. It's the collective responsibility of the organization to make sure their product is good enough to be deliverable to the client. Hence Mark should not be fired.
